### {skynet W3 10722}

For URL: `$ /usr/bin/wget --progress=bar:force:orange:large --directory-prefix=/srv/http/my.domain.com/http/ --output-document=/srv/http/my.domain.com/http/page.html -U --keep-session-cookies -m` Do you have a better solution, where I can download anything with wget and I can execute it to a variable? Thanks A: If you are on Linux (or on MacOS you can use curl), you can use wget to download a file: `wget --directory-prefix=/srv/http/my.domain.com/http/` (You don't need to append any options to wget because that is the default). If you want to process the file in another way, you can use xargs: `xargs -n1 -r -P 8 --no-run-if-empty wget --directory-prefix=/srv/http/my.domain.com/http/` (the -P option limits the number of processes; the --no-run-if-empty option avoids running the command if the file exists, which you can do on a few operating systems using rmdir or unlink). "I'd like to say that he's our next great leader, but I don't know," the hacker known as Sabu bragged at his sentencing. | REUTERS Sabu is part of Silk Road 2.0 The alleged operator of a major online drug bazaar is expected to be sentenced to 20 years in federal prison at a hearing in Brooklyn on Friday. Adam Lynn Doss, also known as Sabu, was an early leader of the Silk Road, which began in early 2011 as a "libertarian utopia" on the Tor anonymity

---

network but became the largest online marketplace for selling illegal drugs. Authorities shut down Silk Road in October 2013 and arrested Sabu a few weeks later after an undercover FBI agent infiltrated the site and purchased two pounds of cocaine. Sabu, who went by the name "FriendlyChemist," posted on Twitter shortly after his arrest that he understood he would be charged with multiple counts of drug trafficking and money laundering in what he called "one of the biggest takedowns of a drug site in the history of the internet." 6d1f23a050
